### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. Claims 1-14 are considered allowable since when reading the claims in light of the specification, as per MPEP 2111.01, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in independent claims, including an invention of a system for isolating sources of variance in parametric data using principal component analysis.

Specifically, Claim 1 discloses a method of *cleaning the data set* to remove measurements that may introduce error, generating a principal component analysis basis from the cleaned data set, estimating an independent component analysis model from the principal component analysis basis, removing a component from the principal component analysis basis when the percentages of variance indicate that the component is a minor component and generating as output the estimated independent component analysis model excluding the minor component.

Independent claim 8 discloses a storage medium tangibly embodying instructions for a computer to implement a method for isolating sources of variance in parametric data using the method disclosed in claim 1.

Art Unit: 2129

A practical application disclosed would be testing of integrated circuit devices.

The claimed computer readable storage medium has been interpreted as being tangible computer memory.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
